ABBREVIATIONS AND NOTES --- January 2001

ABBREVIATIONS & SYMBOLS USED IN THIS REPORT:

=====

T	Trace, an amount too small to measure.	a	Reading taken at 6:30 p.m.
M	Missed reading; no data available.	b	Reading taken at 5:30 p.m.
*	Missed reading; amount included in following measurement.	c	Accumulated total since December 1, 2000
e	Estimated amount based on data from nearby gages.	d	Reading taken at 8:15 p.m.
?	Questionable value based on data from nearby gages.	f	Reading taken at 8:00 p.m.
		g	Reading taken at 8:00 a.m.
NW	Northwest sector of network.		
NE	Northeast sector of network.		
SE	Southeast sector of network.		
SW	Southwest sector of network.		
SECT	Geographic sector of network, based on direction of gage from Broad and High Streets (extended) in Columbus.		
TOT.	Total.		
s	Melted equivalent of measured snowfall at site based on melting ratio from Port Columbus for same storm event.		

The Central Ohio Raingage Network (CORN) consists of several municipal and N.O.A.A. gages combined with gages of employees or friends of the following organizations: EMH&T, Inc.; ODNR; Dodson-Stilson Assoc.; USGS/Water Resources Division; the City of Delaware, Ashland Chemical Corp., the Grandview High School Class of 1965, and Columbia Gas of Ohio.

NOTES:

=====

1. Gages with daily totals are generally for those volunteers who report directly to Bob Davis of Evans, Mechwart, Hambleton, and Tilton, Inc. (EMH&T) Consulting Engineers. Information for Port Columbus Airport is obtained from the National Weather Service's Internet web site. For daily totals of other gages in network, contact Dave Cashell at ODNR / Division of Water.
2. Precipitation measurements for the majority of those gages with daily totals are typically taken from plastic rain gages of at least 5-inch capacity.
3. The CORN logogram was designed by Steve Davies of Dodson-Stilson Associates.
4. ADDITIONS to December 2000 report: (Data received after report publication):
Gage No. 14: Dec. precipitation total = 1.93"; yr. = M
Gage No. 15: Dec. precipitation total = 2.04"; yr. = 31.47"
5. CORRECTIONS to December 2000 report:
On page 16: Gage #14 monthly total of 1.93" would have been lowest monthly total in network; Gage #15 yearly total of 31.47" would have been the lowest annual total in the network. Also, the 2.30" of rainfall recorded on Dec. 15-16, 2000 at Port Columbus should have been described as the 2nd largest 24-hour duration rainfall at that location for any December, instead of the largest. The maximum 24-hour December rainfall of 2.56" actually occurred on December 21, 1998.
On page 17: It should have been stated that the average annual total precipitation at Gage #18 for the period of 1971-2000 is nearly 2.5" higher, not 1.5" higher, than the Port Columbus average for the same time period.
6. Data for Gages 14, 15, 33, 105, 111, and 112 were not available at the time of publication.

SUMMARY INFORMATION --- January 2001

Precipitation was below normal over nearly all of the Central Ohio region during January. Monthly totals at individual stations ranged from 0.48 of an inch in Plain City (Madison County) to 2.60 inches near Lancaster (Fairfield County). Sector averages for the month were as follows: NW = 1.17 inches; NE = 1.36 inches; SE = 1.50 inches, and SW = 1.32 inches. The 4-sector average for the month was 1.34 inches; normal precipitation for January at Port Columbus is 2.18 inches, based on 1961-1990 data, or 2.53 inches based on 1971-2000 data. Port Columbus reported 6.3 inches of snowfall for January; normal snowfall is 8.4 inches for the month. The 2000-2001 seasonal total at Port Columbus now stands at 21.2 inches; normal snowfall for the period of October through January is 16.5 inches, based on 1961-1990 data. For comparison purposes, revised snowfall averages for Port Columbus, based on 1971-2000 data, are presented in the table below.

AVERAGE SNOWFALL BY MONTH (in inches)		
MONTH	PORT COLUMBUS (1961-1990)	PORT COLUMBUS (1971-2000)
January	8.4	10.0
February	6.2	6.1
March	4.5	3.9
April	1.1	1.1
May	T	T
.....		
October	T	0.2
November	2.4	1.5
December	5.7	4.7
Annual	28.3	27.5

The first 3-4 weeks of January were extremely dry over most of the Central Ohio area; most of the month's precipitation fell during the last 6 days of the month. The most significant precipitation during the month fell during the period of January 29-31. The precipitation from these storms fell in the form of rain; the majority of our volunteers reported between 0.5 and 1.0 inch of rainfall for the 3-day period, but some isolated areas in the southern and eastern portions of the network reported between 1 and 2 inches of rain from the storms. There were no other significant precipitation events during the month.

MONTHLY STATISTICS		
TOTAL MONTHLY PRECIPITATION:		END-OF-MONTH
SECTOR AVERAGES: MONTH ---> 2001		RESERVOIR ELEVATIONS / MONTHLY CHANGE:
NW = 1.17"	1.17"	O'Shaughnessy = 849.48 ft. + 0.67 ft.
NE = 1.36"	1.36"	Hoover = 891.55 ft. - 0.38 ft.
SE = 1.50"	1.50"	Alum Creek = 884.57 ft. + 0.95 ft.
SW = 1.32"	1.32"	PALMER DROUGHT SEVERITY INDEX:
4-SECTOR AVG. = 1.34" ---> 1.34"		End-of-Month For Central Ohio = 0.0
NORMAL PRECIP. = 2.18" ---> 2.18"		(normal)
