ABBREVIATIONS AND NOTES --- June 2000

ABBREVIATIONS & SYMBOLS USED IN THIS REPORT:

=====

T	Trace, an amount too small to measure.	a	Reading taken at 7:30 p.m.
M	Missed reading; no data available.	b	Reading taken at 8:00 a.m.
*	Missed reading; amount included in following measurement.	c	Reading taken at 7:30 a.m.
e	Estimated amount based on data from nearby gages.	d	Reading taken at 9:00 p.m.
?	Questionable value based on data from nearby gages.		
NW	Northwest sector of network.		
NE	Northeast sector of network.		
SE	Southeast sector of network.		
SW	Southwest sector of network.		
SECT	Geographic sector of network, based on direction of gage from Broad and High Streets (extended) in Columbus.		
TOT.	Total.		

The Central Ohio Raingage Network (CORN) consists of several municipal and N.O.A.A. gages combined with gages of employees or friends of the following organizations: EMH&T, Inc.; ODNR; Dodson-Stilson Assoc.; USGS/Water Resources Division; the City of Delaware, Ashland Chemical Corp., and the Grandview High School Class of 1965.

NOTES:

=====

1. Gages with daily totals, are generally for those volunteers who report directly to Bob Davis of Evans, Mechwart, Hambleton, and Tilton, Inc. (EMH&T) Consulting Engineers. Information for Port Columbus Airport is obtained from the National Weather Service's Internet web site. For daily totals of other gages in network, contact Dave Cashell at ODNR / Division of Water.
2. Precipitation measurements for the majority of those gages with daily totals are typically taken from plastic rain gages of at least 5-inch capacity.
3. The CORN logogram was designed by Steve Davies of Dodson-Stilson Associates; the location map headings on pages 1 and 2 of this report were prepared by Cheryl Cockrell of EMH&T.
4. CORRECTIONS: For Gage #69, annual totals incorrect for February, March, April and May 2000. Corrected totals are: Feb. = 7.07"; Mar. = 9.79"; Apr. = 15.50", and May = 19.76". For Gage #21, annual totals incorrect for April and May 2000. Corrected totals are: Apr. = 12.85", and May = 18.25". For Gage #18, annual total incorrect for May 2000; corrected total = 17.92".
5. Data for Gages 12, 14, 15, 77, 99, 104, 105 and 109 were not available at the time of publication.

SUMMARY INFORMATION --- June 2000

Precipitation averaged below normal over all four sectors of the network during June. Monthly totals at individual stations ranged from 1.56 inches at the EMH&T, Inc. office in Olde Gahanna (northeastern Franklin County) to 6.73 inches at the NWS Cooperative station near Sedalia (southwestern Madison County). Sector averages for June were as follows: NW = 3.26 inches; NE = 2.85 inches; SE = 3.73 inches, and SW = 3.67 inches. The 4-sector average for the month was 3.38 inches; normal precipitation for June at Port Columbus is 4.04 inches.

Many of the storms that occurred during the month were widely scattered, dropping heavy rains in some areas, and little or no rain in others. These hit-and-miss storms were common over the Central Ohio area during the period of June 11-21; one good example occurred during the evening of June 12. A thunderstorm with intense rainfall dropped 1.75 inches of rain in just 30 minutes at Port Columbus, while our EMH&T gage, located less than 2 miles away in Olde Gahanna, recorded just 0.03" of rain from the storm. This particular storm event at Port Columbus was the equivalent of a 25-year storm at that location. During a 9-day period from June 11 through June 19, most of our observers received at least one inch of rain from the isolated storm events, with some gages receiving more than 3 inches. And at our gage near Marion, nearly 6 inches of rain was recorded in the time period between June 6 and June 21.

Precipitation for calendar year 2000 was still averaging about 4 to 5 inches above normal over all 4 sectors of our network through June. Annual totals at individual stations ranged from 18.51 inches near Georgesville (southwestern Franklin County) to 29.11 inches near Commercial Point in northcentral Pickaway County. Sector averages for the year through June are as follows: NW = 22.75 inches; NE = 23.98 inches; SE = 23.50 inches, and SW = 23.82 inches. The 4-sector average for the year is 23.51 inches; normal precipitation for the period of January through June at Port Columbus is 18.87 inches. The Palmer Drought Severity Index (PDSI) for the Central Ohio climatological region at the end of June was - 2.5, which represents a moderate drought. While our surface water supplies are in good shape, the drought designation mainly reflects the fact that we have not yet made up the large rainfall deficit that occurred during 1999 (about 9 inches below normal), which continues to adversely affect groundwater / water well supplies in our region.

MONTHLY STATISTICS

TOTAL MONTHLY PRECIPITATION:

SECTOR AVERAGES: MONTH --->	2000
NW = 3.26"	22.75"
NE = 2.85"	23.98"
SE = 3.73"	23.50"
SW = 3.67"	23.82"

4-SECTOR AVG. = 3.38" --->	23.51"
NORMAL PRECIP. = 4.04" --->	18.87"

END-OF-MONTH

RESERVOIR ELEVATIONS / MONTHLY CHANGE:

O'Shaughnessy =	848.91 ft.	- 0.44 ft.
Hoover =	892.05 ft.	- 2.30 ft.
Alum Creek =	888.35 ft.	- 0.47 ft.

PALMER DROUGHT SEVERITY INDEX:

End-of-Month For Central Ohio = - 2.5
(moderate drought)
