ABBREVIATIONS AND NOTES --- October 2000

ABBREVIATIONS & SYMBOLS USED IN THIS REPORT:

=====

T	Trace, an amount too small to measure.	a	Reading taken at 7:30 p.m.
M	Missed reading; no data available.		
*	Missed reading; amount included in following measurement.		
e	Estimated amount based on data from nearby gages.		
?	Questionable value based on data from nearby gages.		
NW	Northwest sector of network.		
NE	Northeast sector of network.		
SE	Southeast sector of network.		
SW	Southwest sector of network.		
SECT	Geographic sector of network, based on direction of gage from Broad and High Streets (extended) in Columbus.		
TOT.	Total.		

The Central Ohio Raingage Network (CORN) consists of several municipal and N.O.A.A. gages combined with gages of employees or friends of the following organizations: EMH&T, Inc.; ODNR; Dodson-Stilson Assoc.; USGS/Water Resources Division; the City of Delaware, Ashland Chemical Corp., and the Grandview High School Class of 1965.

NOTES:

=====

1. Gages with daily totals, are generally for those volunteers who report directly to Bob Davis of Evans, Mechwart, Hambleton, and Tilton, Inc. (EMH&T) Consulting Engineers. Information for Port Columbus Airport is obtained from the National Weather Service's Internet web site. For daily totals of other gages in network, contact Dave Cashell at ODNR / Division of Water.
2. Precipitation measurements for the majority of those gages with daily totals are typically taken from plastic rain gages of at least 5-inch capacity.
3. The CORN logogram was designed by Steve Davies of Dodson-Stilson Associates.
4. CORRECTIONS TO PREVIOUS REPORTS:
 - (a) For September 2000 report, at Gage # 90, monthly total should have been 4.70", and yearly total should have been 33.97 inches.
 - (b) For June, July, August, and September 2000 reports, at Gage # 112, annual totals should have been 22.64", 26.17", 28.69", and 31.16", respectively.
5. Data for Gages 12, 14, 15, 31, 32 and 106 were not available at the time of publication.

SUMMARY INFORMATION --- October 2000

Precipitation was above normal over most of the Central Ohio area during October; the main exception s were in the extreme northern and southern portions of the 10-county area. This above-normal precipitation occurred in spite of the fact that measureable rainfall was recorded on only 5 days during the month. Monthly totals at individual stations ranged from 1.80 inches near Marion to 4.55 inches in the eastern portion of the City of Newark (east-central Licking County). All of the network gages north of a line from Bellefontaine to Mount Vernon recorded a total precipitation of 2 inches or less for the month. Sector averages for October were as follows: NW = 3.26"; NE = 3.31"; SE = 3.05", and SW = 3.17". The 4-sector average for the month was 3.20 inches; normal precipitation for October is 2.15 inches at Port Columbus. There was no measureable snowfall recorded at Port Columbus during October.

The most significant storm of the month occurred on October 4-5. Periods of scattered showers and thundershowers from mid-evening on the 4th through the day on the 5th produced between 2.5 and 3.5 inches of rainfall over portions of northern Madison and Franklin Counties, southern Union and Delaware Counties, and central Licking County. One other significant storm occurred on October 16, with areas south and east of a line extending from London through Grandview Heights to Gahanna and Newark receiving between 0.75 and 1.4 inches of rain from showers falling during the day.

Precipitation for calendar year 2000 continues to average significantly above normal over all four sectors of the network. Annual totals at individual stations range from 30.50 inches near Georgesville (southwestern Franklin County) to 47.66 inches near Commercial Point in northern Pickaway County. Sector averages for the year are as follows: NW = 37.51"; NE = 38.85"; SE = 39.06", and SW = 39.11". The 4-sector average for the first 10 months of the calendar year is now 38.63 inches; normal precipitation for the period of January through October at Port Columbus is 32.01 inches. Normal precipitation for an entire year at Port Columbus is 38.09 inches; thus the average rainfall for the overall network has now exceeded the normal annual total with two months still remaining in the calendar year.

MONTHLY STATISTICS

TOTAL MONTHLY PRECIPITATION:

 SECTOR AVERAGES: MONTH ---> 2000

 NW = 3.26" 37.51"
 NE = 3.31" 38.85"
 SE = 3.05" 39.06"
 SW = 3.17" 39.11"

4-SECTOR AVG. = 3.20" ---> 38.63"
 NORMAL PRECIP. = 2.15" ---> 32.01"

END-OF-MONTH

RESERVOIR ELEVATIONS / MONTHLY CHANGE:

 O'Shaughnessy = 848.65 ft. - 0.06 ft.
 Hoover = 885.01 ft. + 0.36 ft.
 Alum Creek = 883.75 ft. - 2.42 ft.

PALMER DROUGHT SEVERITY INDEX:
