ABBREVIATIONS AND NOTES --- September 2000

ABBREVIATIONS & SYMBOLS USED IN THIS REPORT:

=====

T	Trace, an amount too small to measure.	a	Reading taken at 10:00 a.m.
M	Missed reading; no data available.	b	Reading taken at 6:00 p.m.
*	Missed reading; amount included in following measurement.	c	Reading taken at 8:30 p.m.
e	Estimated amount based on data from nearby gages.	d	Reading taken at 1:00 p.m.
?	Questionable value based on data from nearby gages.	f	Reading taken at 8:00 p.m.
NW	Northwest sector of network.	g	Reading taken at 9:30 p.m.
NE	Northeast sector of network.	h	Reading taken at 10:00 p.m.
SE	Southeast sector of network.	i	Reading taken at 7:15 p.m.
SW	Southwest sector of network.	j	Reading taken at 5:30 p.m.
SECT	Geographic sector of network, based on direction of gage from Broad and High Streets (extended) in Columbus.	k	Reading taken at 10:30 p.m.
TOT.	Total.	m	Reading taken at 9:00 p.m.
		n	Reading taken at 7:30 p.m.

The Central Ohio Raingage Network (CORN) consists of several municipal and N.O.A.A. gages combined with gages of employees or friends of the following organizations: EMH&T, Inc.; ODNR; Dodson-Stilson Assoc.; USGS/Water Resources Division; the City of Delaware, Ashland Chemical Corp., and the Grandview High School Class of 1965.

NOTES:

=====

1. Gages with daily totals, are generally for those volunteers who report directly to Bob Davis of Evans, Mechwart, Hambleton, and Tilton, Inc. (EMH&T) Consulting Engineers. Information for Port Columbus Airport is obtained from the National Weather Service's Internet web site. For daily totals of other gages in network, contact Dave Cashell at ODNR / Division of Water.
2. Precipitation measurements for the majority of those gages with daily totals are typically taken from plastic rain gages of at least 5-inch capacity.
3. The CORN logogram was designed by Steve Davies of Dodson-Stilson Associates.
4. ADDITIONS: Information received after publication of August 2000 report:
 - Gage #14: August precip. = 3.69"; yr. = M
 - Gage #15: August precip. = 4.14"; yr. = 22.89".
 - Gage #31: August precip. = M; yr. = M
 - Gage #72: August precip. = 5.80"; yr. = 30.35". Gage data discontinued at end of August 2000.
 - Gage #80: August precip. = 3.17"; yr. = 28.23".
 - Gage #107: August precip. = 2.38"; yr. = 28.74".
5. September data for Gages 52, 64, 76, 87, 103, 105, 106, 108, 111, 112, 115, and 116 were not available at the time of publication.

SUMMARY INFORMATION --- September 2000

Precipitation was above normal over most of the Central Ohio area during September. Monthly totals ranged from 1.50 inches near Cardington (SW Morrow County) to 6.90 inches near Baltimore (NC Fairfield County). Sector averages for September were as follows: NW = 4.16"; NE = 4.38"; SE = 5.36", and SW = 4.22". The 4-sector average for the month was 4.53 inches; normal precipitation for September at Port Columbus is 2.96 inches. For most of our observers, the major portion of the month's rainfall occurred during the period of September 20-27. The most significant storms of the month occurred on September 20 and September 23.

The storms of September 20 spawned tornadoes that touched down in the western and northern portions of Xenia, Ohio (just SW of our network area), and also in southern Delaware and NW Licking Counties within our network area. In Xenia, an F4 tornado, with winds of 207-260 mph, killed one person, and destroyed or heavily damaged at least 100 homes and 20 businesses in that city. The tornado was about 200 yards wide, and bounced up and down along a path of about 6 miles. The tornado that affected Delaware and Licking Counties was classified as an F2 tornado, with winds of 113-157 mph. It touched down initially on Harlem Road in Delaware County, about 1 mile north of the Franklin County line, and moved NE through Harlem Township, crossing the Delaware/Licking County line at Needles Road, and continued along its 25-mile path into Knox County, ending near Martinsburg (SE Knox County). The tornado destroyed or damaged at least 28 homes, and destroyed 12 buildings at the Buckeye Egg Farm just south of Hartford in NW Licking County. Rainfall amounts of 1 to 2 inches were reported from volunteers during the storms of the 20th along a SW-NE band from SW Franklin County to NE Licking County.

The major rainfall-producing storm, however, occurred on September 23, as clusters of showers and thunderstorms moved across the Central Ohio area from the late evening hours of September 19 to late evening on the 20th. Rainfall amounts of 2 to 3 inches were common inside Franklin, Licking and Fairfield Counties, with as much as 5.0 inches of rain reported near Baltimore in NW Fairfield County. At CORN headquarters in SW Dublin, 2.25" of rain was recorded in less than 1 hour from one of the clusters of storms; this is the equivalent of about a 25-year storm event.

Precipitation for calendar year 2000 continues to average above normal over Central Ohio. Annual totals at individual stations range from 27.26 inches near Georgesville (SW Franklin County) to 44.46 inches near Commercial Point (northern Pickaway County). Sector averages for the year are as follows: NW = 34.25"; NE = 35.66"; SE = 36.23", and SW = 35.28". The 4-sector average for the year-to-date is 35.36 inches; normal precipitation for the period of January through September at Port Columbus is 29.86 inches. Central Ohio's period of drought, which began in late May 1999, ended in late September 2000, based on values of the Palmer Drought Severity Index.

MONTHLY STATISTICS

TOTAL MONTHLY PRECIPITATION:

SECTOR AVERAGES: MONTH --->	2000
NW = 4.16"	34.25"
NE = 4.38"	35.66"
SE = 5.36"	36.23"
SW = 4.22"	35.28"

4-SECTOR AVG. = 4.53" --->	35.36"
NORMAL PRECIP. = 2.96" --->	29.86"

END-OF-MONTH

RESERVOIR ELEVATIONS / MONTHLY CHANGE:

O'Shaughnessy = 848.71 ft.	- 0.16 ft.
Hoover = 884.65 ft.	- 1.12 ft.
Alum Creek = 886.17 ft.	- 1.52 ft.

PALMER DROUGHT SEVERITY INDEX:

End-of-Month For Central Ohio = - 0.4
(near normal)
