Notes:

- Volunteers who report daily precipitation totals submit their data directly to Bob Davis or Kristi Gardner (CORN). Data for gages with monthly totals only have been obtained from Scott Kirk at ODNR / Division of Soil and Water Resources or from NWS website.
- The Central Ohio Raingage Network is a group of volunteer precipitation observers who typically report precipitation measurements taken from plastic rain gauges of at least 5-inch capacity.
- "Station I.D." nomenclature is adapted from National Weather Service (NWS) procedure for naming Cooperative Observer stations. The station is identified either by the nearest community or well-known landmark, along with a distance in miles, and direction from that community or landmark, if it exceeds approximately 1 mile. For example, Marion 2N represents a site that is approximately 2 miles north of the City of Marion. If no distance or direction is included with the station I.D., the station is located within the community, or less than 1 mile from the identified landmark.
- Gage ID numbers from 201-213 and 301-304 represent volunteers whose gages are located outside of the 10-county area officially designated by the NWS as the "Central Ohio" climatic section. The "Central Ohio" area consists of Marion, Morrow, Union, Delaware, Licking, Madison, Franklin, Fairfield, Fayette and Pickaway Counties.
- The CORN logo used on data recording sheets was designed by Steve Davies and digitized by Mike Moore.
- Copies of past CORN reports can be obtained from the CORN website, www.centralohiorain.com, or by contacting CORN Administrative staff.
- ADDITIONS → Information received after publication of the May report:
 Gage #12: May precip. = 2.05" Gage #33: May precip. = 3.38" Gage #105: May precip. = 4.13"
 Gage #111: Apr. precip. = 3.94"; May precip. = 4.69" Gage #115: May precip. = 3.86"
 Gage #5: May precip. = 3.28"
- CORRECTION: In the May 2015 CORN report, the monthly total for Gage #22 was reported to be 3.58 inches; that total should have been 4.11 inches.
- Data for Gage #2 will be terminated as of July 1, 2015. Gage #14 will become the only "OSU Golf Course" location in the network. Due to the close proximity of Gage #14 to Gage #2, the monthly totals for Gage #2 during the period of January through April 2015 will be assumed to be valid at the location of Gage #14 to maintain an annual total for the OSU Golf Course location in the network.
- Data for Gages 46 and 213 were not available at the time of publication.

Central Ohio Significant Storm Information for Month:

June 12-20: A series of weather systems, including the remnants of Tropical Storm Bill passed through Central Ohio during the period, with measureable rainfall being reported by many of our volunteers on every day during the 9-day period. Total amounts for the period ranged from about 3.5" to 9.9", with the heaviest amounts reported in bands from Delaware to Utica, and also from Hilliard through Grandview Heights to Carroll.

Miscellaneous:

SPECIAL NOTE FROM THE DIRECTOR: With my move to South Carolina in July 2015, "CORN Headquarters" will be moving from Upper Arlington, Ohio to Summerville, South Carolina. As a result, I will no longer be able to utilize our Data Manager, Dianne Kahal-Berman to input our volunteers' data into each monthly CORN report. I have been blessed with her faithful service in CORN since June 2007; first as Assistant Director from June 2007 through September 2011, and then most recently as Data Manager from October 2011 through June 2015. Dianne's swift and accurate entry work with the vast array of styles and forms of submitted rainfall data far surpasses my slow, "hunt-and peck" data entry style. We really appreciate her taking the time out of her busy schedule at ODOT to help us with the preparation of our monthly reports.
