### ABBREVIATIONS AND NOTES

|      |                                                                                                                             |   |                            |
|------|-----------------------------------------------------------------------------------------------------------------------------|---|----------------------------|
| T    | Trace, an amount too small to measure                                                                                       | a | Reading taken at 7:30 p.m. |
| M    | Missed reading; no data available                                                                                           | b | Reading taken at 9:00 p.m. |
| *    | Missed reading; amount included in following measurement                                                                    | c | Reading taken at 7:30 a.m. |
| e    | Estimated amount, based on data from nearby gauges                                                                          | d | Reading taken at 4:00 p.m. |
| ?    | Questionable value, based on data from nearby gauges                                                                        | f | Reading taken at 5:00 p.m. |
| NW   | Northwest sector of network                                                                                                 |   |                            |
| NE   | Northeast sector of network                                                                                                 |   |                            |
| SE   | Southeast sector of network                                                                                                 |   |                            |
| SW   | Southwest sector of network                                                                                                 |   |                            |
| SECT | Geographic sector of network, based on direction of gauge from U.S. Route 23 (or Rt. 4 north of Marion), and U.S. Route 40. |   |                            |
| NWS  | National Weather Service                                                                                                    |   |                            |
| s    | Estimated amount of water equivalent from a measured amount of snowfall.                                                    |   |                            |

#### Notes:

- Most of our volunteers who report daily precipitation totals submit their data directly to Bob Davis. Data for gages with monthly totals only have been obtained from Scott Kirk at ODNR / Division of Soil and Water Resources or from NWS websites. Daily totals for Port Columbus and Charleston, SC Airports are obtained from NWS websites.
- The Central Ohio Raingage Network is a group of volunteer precipitation observers who typically report precipitation measurements taken from plastic rain gauges of at least 5-inch capacity.
- "Station I.D." nomenclature is adapted from National Weather Service (NWS) procedure for naming Cooperative Observer stations. The station is identified either by the nearest community or well-known landmark, along with a distance in miles, and direction from that community or landmark, if it exceeds approximately 1 mile. For example, Marion 2N represents a site that is approximately 2 miles north of the City of Marion. If no distance or direction is included with the station I.D., the station is located within the community, or less than 1 mile from the identified landmark.
- Gage ID numbers from 201-209 and 301-311 represent volunteers whose gages are located outside of the 10-county area officially designated by the NWS as the "Central Ohio" climatic section. The "Central Ohio" area consists of Marion, Morrow, Union, Delaware, Licking, Madison, Franklin, Fairfield, Fayette and Pickaway Counties.
- The intent of the precipitation tables in this report is to provide liquid equivalent amounts of precipitation that occurred in the 24 hours prior to the observation time on the date indicated in the table at each gauge site. Since the principal author of this report currently resides outside of the Central Ohio area, and does not personally experience the reported storms, it is not possible to positively confirm the dates of the storms as presented in this report. For future reference purposes, minor allowances may need to be made at times for defining actual dates of historical CORN rainfall amounts.
- Copies of past CORN reports can be obtained from the CORN website, [www.centralohiorain.com](http://www.centralohiorain.com), or by contacting CORN Administrative staff.
- Data for Gages 105, 111, and 113 were not available at the time of publication.

| <i>Thanks also to CORN storm spotters Cathy Peterfish, Becky Stamm, Diane Ehrbar, and Jeff Bauer, who send alerts during significant storm events.</i> |                                                                |

# CENTRAL OHIO RAINGAGE NETWORK

Precipitation Report for November 2024

Prepared by Bob Davis and Becky Stamm

## SUMMARY INFORMATION for November 2024

| PRECIPITATION FOR MONTH:                                                                                                                                                            | PRECIPITATION FOR CALENDAR YEAR:                                                                                                                                                      |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Overall Central Ohio precipitation: <b>Averaged a little above normal over all 4 sectors of the network.</b>                                                                        | Overall Central Ohio precipitation: <b>Averaging below normal over all 4 sectors of the network.</b>                                                                                  |
| Range of monthly precipitation totals in Central Ohio:<br>Low: <b>2.50" @ New California 3N (Union Co.)</b><br>High: <b>4.60" @ Lithopolis (Fairfield Co.)</b>                      | Range of annual precipitation totals in Central Ohio:<br>Low: <b>28.52" @ Blacklick Woods 2NNE (Franklin Co.)</b><br>High: <b>44.62" @ Utica (Licking Co.)</b>                        |
| Significant precipitation totals outside Central Ohio area:<br>In Ohio: <b>5.16" @ Dresden 2NW (Muskingum Co.)</b><br>In other States: <b>2.10" @ Estelle Park in Asheville, NC</b> | Significant precipitation totals outside Central Ohio area:<br>In Ohio: <b>58.94" @ Dresden 2NW (Muskingum Co.)</b><br>In other States: <b>63.00" @ Estelle Park in Asheville, NC</b> |
| Snowfall at Port Columbus: <b>0.1 inch</b> (normal snowfall for November is 1.2 inches)                                                                                             | Total snowfall for season (October through November) at Port Columbus: <b>0.2 inch</b> (normal snowfall for October through November is 1.4 inches)                                   |

| Central Ohio Sector Data              | Average Precipitation for Month | Average Precipitation for Year |
|---------------------------------------|---------------------------------|--------------------------------|
|                                       | (in.)                           | (in.)                          |
| NW Sector                             | 3.54                            | 34.04                          |
| NE Sector                             | 3.76                            | 35.97                          |
| SE Sector                             | 3.69                            | 35.90                          |
| SW Sector                             | 4.02                            | 32.73                          |
| <b>Overall 4-sector</b>               | <b>3.75</b>                     | <b>34.66</b>                   |
| Normal precipitation at Port Columbus | 2.79                            | 38.44                          |

Central Ohio Significant Storm Information for Month:

**November 10:** The precipitation was relatively uniform with most of our observers reporting a total of between 0.7 and 1.1 inches of rain from the storm.

**November 14:** Again, precipitation totals were relatively uniform with this storm, with amounts generally ranging from 0.7 to 1.2 inches. The lowest amounts were generally reported in the northern portion of the network, and the heaviest amounts were measured in the south.

Miscellaneous: A special thanks this month goes to CORN volunteer Becky Stamm, who travelled to CORN Headquarters here in South Carolina and assisted me in the preparation of this month's report.
